

Use and maintenance instructions

Balcony tiles and iron balcony brackets

Cleaning of balcony tiles

Alnova's balcony tiles do not require specific regular maintenance. If desired, you can easily brush the tiles with a broom. Any stains can be cleaned with lukewarm water and a soft cloth.

It's IMPORTANT to never salt the balcony as it can damage the concrete.

Cleaning of iron balcony brackets

Alnova's wrought iron balcony brackets do not require regular maintenance. If you wish to clean them to remove stains and dust, use water, a mild cleaner, and a soft cloth.

DO NOT use abrasive cleaners like scouring powder or acid-based cleaners, or abrasive sponges.

Contractor's responsibility

Alnova is not responsible for faults or damages to the products if the issue arises due to the products being used for purposes other than intended, or if it arises from a specifically prescribed or specified construction by the customer, or if the product has been installed in a particularly exposed environment, or if the customer has handled the products contrary to Alnova's use and maintenance instructions.
